Who is Mags?

Maggie Garvin started Mags on the Move back in 2013 after years of guiding guest through exotic rivers and making jokes about plastic animals at the World Famous Jungle Cruise in Walt Disney World. Eager to experience the world, she now guides her readers through even more exotic locales, this time with real animals and just as many bad jokes! Did you know that in the jungle bamboo can grow up to 6 stories high? Some people say 7, but that's a whole 'nother story. Readers of Mags on the Move are inspired and transported around the world, with a healthy dose of sarcasm.
